DETAILED ACTION

Election/Restrictions

1. Claims 5-13 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 3/21/05.
2. This application contains claims 5-13 drawn to an invention nonelected with traverse in the paper filed 3/12/05. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Harwood (USPN 4590652).

Harwood teaches a method of welding a tubular member having a thin portion (opening) on its circumference and having a circumferential outer edge characterized in that welding is started at a point angularly spaced from the thin portion which would

Art Unit: 1725

tend to deform the circular member into an oval shape (figures 4-6 and col 4 lines 25-45). As shown in figure 3, the weld line appears to be on the top of the tube with some openings on the side of the tube, which would create a 90-degree angular spacing. As shown in figure 1a, openings are formed on opposite sides of the tube. Therefore the opposite weld line would be at a 90 degree spacing at a midpoint between the two thin portions.

Response to Arguments

5. Applicant's arguments with respect to claims 1-4 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Dufft (USPN 4566623, oval deformation, thin area) and Peterson (USPN 4202484).

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1725

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
